

# #WeAre International Student Charter

The #WeAreInternational Student Charter provides guidance on the fundamental principles for delivering a world-class student experience, from pre-arrival to post-graduation.

1. Create a welcoming, inclusive, and equitable environment for international students in the UK

2. Value international students' perspectives and voices in institutional policy and decision-making

3. Integrate sustainability as a core value in institutional internationalisation strategies

4. Monitor and evaluate existing available support and provision for international students on an ongoing basis

5. Make available targeted support for international students in every area of the student experience

As supporters of #WeAreInternational, institutions and organisations are pledging to work towards the provision of the highest level of international student experience and support, according to the five principles.
